

Augmented Physical Therapy

Smart Solutions for Remote Orthopedic care

Physical Therapy Falls Short

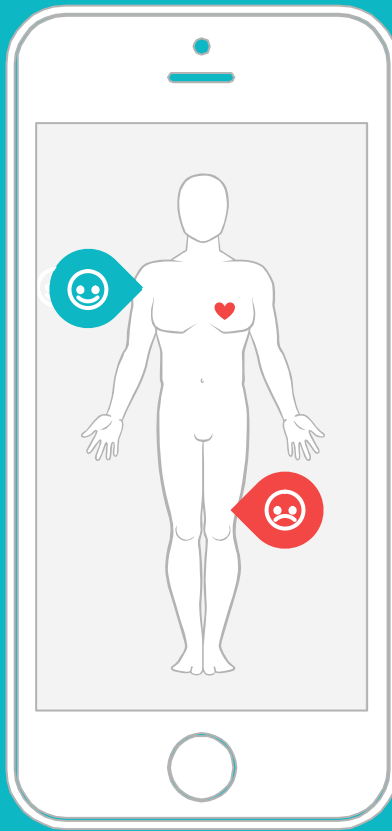

- ▶ Limited time
- ▶ Imprecise instruction
- ▶ No feedback between visits
- ▶ Low patient compliance

3

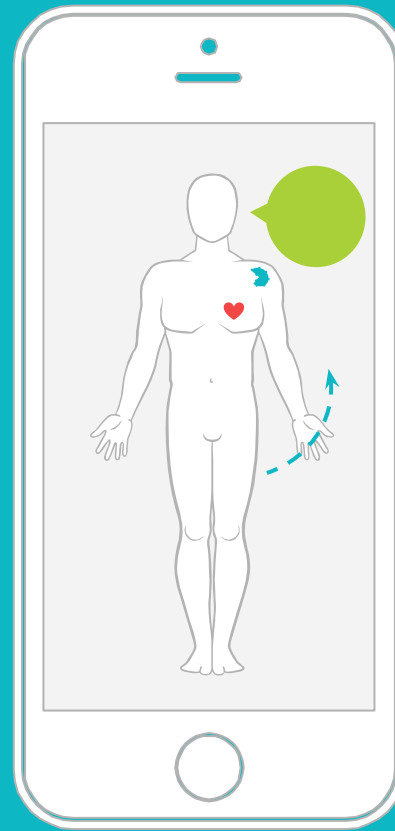

A physical therapist in a white lab coat is assisting a female patient in a pink tank top. The therapist is holding a red dumbbell in the patient's right hand, guiding her arm as she performs a bicep curl. The patient is looking at the dumbbell with a focused expression. The background is a plain, light-colored wall.

11.3 million
outpatient PT visits 2016

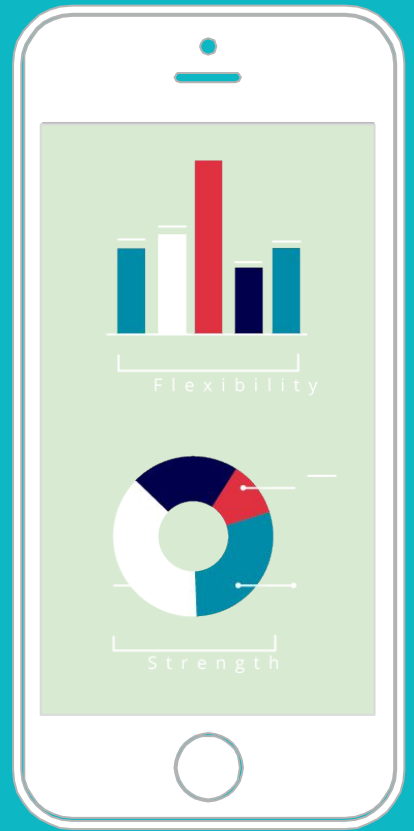

- ▷ Video conferencing
- ▷ Direct Instruction
- ▷ Precise analytics
- ▷ Clear comparisons
